T1-01: Deeper project ideas

1. **System card:** Map a real AI feature, its owners, artifacts, and three failure paths. Deliverable: a two-page system card with sources.
2. **Evaluation gap audit:** Compare an advertised model metric with a deployment metric and identify the distribution shift. Deliverable: reproducible analysis or documented design review.
3. **Safe course assistant prototype:** Build a retrieval-only assistant over public course materials; demonstrate refusal, citation, and injection test cases. Deliverable: code, test transcript, and risk note.
